Creative Frontend Developer with over 4 years of experience specializing in React. Skilled in building dynamic, responsive web applications and transforming designs into functional UI components. Proficient in JavaScript, CSS, and delivering exceptional user experiences. Strong problem-solver with a focus on code quality and innovation in fast-paced environments.

WORK EXPERIENCE

Javascript Developer | Oliver Wyman
Mar 2022 – Present

- Lead frontend development for various interactive websites and applications, utilizing React, Redux, Next.js, and JavaScript frameworks.
- Build and manage AEM (Adobe Experience Manager) pages for internal projects at Oliver Wyman, ensuring content consistency and brand alignment.
- Translate design wireframes into high-quality, responsive UI components using Figma and CSS/SASS.
- Integrate complex data visualizations using D3.js and Highcharts, improving user interaction and overall application performance.
- Collaborate with cross-functional teams (designers, product managers, and backend developers) to ensure seamless functionality and a consistent user experience.
- Participate in code reviews, ensuring adherence to best practices and improving code quality across projects.

Full Stack Developer | Freelancer
Jan 2021 – March 2022

- Design, develop, and maintain web applications using a combination of React, Node.js, and C# (ASP.NET, MVC) in a freelance capacity.
- Deliver client-facing applications with a focus on frontend development using React, TypeScript, and Tailwind CSS for responsive design.
- Collaborate with clients and designers to iterate on feedback and improve UI/UX features based on project requirements.
- Integrate GraphQL APIs into frontend components to optimise data retrieval and enhance the overall performance of web applications.
